Mono Chess: board and moves screen

Desktop, 1440 × 900. Design reference for the rust-chess web GUI (Leptos + Axum).

Phone, 390 wide

Colours

#16120e	background	page, label cut-outs in the frame
#f2ece4	accent	frame line, running clock, current move
#ddd6ce	text	names, moves; also light squares
#8c837a	dim	waiting clock and name, captures, icons
#6f665d	faint	move numbers
#2f2822	pane border	moves pane outline
#2a241e	divider	rules inside the pane, current move bg
#211b16	hover	buttons and moves on hover
#2b2520	dark square	board
#b09a68	last move	45% over light, 40% over dark; selected 75%
#c05a50	check / low time	75% over the king square; clock ≤ 30 s

Pieces

- White: fill #fbf9f6, 2px #100e0c outline.
- Black: fill #100e0c; 1.5px #ddd6ce outline on dark squares so it stays visible.
- Legal-move dot: 26% of the square, rgba(16,13,10,0.45).
- The mockup uses Unicode glyphs as a stand-in; the real app uses an SVG set drawn with currentColor.

Type and geometry

- Fira Code only. 13px UI, 14px moves, 10px/500 coordinates. Ligatures off, tabular numbers.
- Board framed by a 1px #f2ece4 line, 14px outside the board.
- Name, captured pieces and +N sit in the frame line at the left corner; the clock at the right corner. Labels cut the line with the page background.
- Moves pane: 1px border, title "moves" set into the top border, 300px wide, 28px from the board.
- Radius 2px on board, pane, buttons and move highlights. No shadows, no gradients.
- Content max width 1080px, centred.

Behaviour

- Go back: click any move, the ⏮ ◀ ▶ ⏭ buttons, or ← → ↑ ↓. "back to current move" appears only while looking back.
- Click own piece: square tints, dots on legal targets.
- Flip button or f. ⋯ menu: offer draw, resign, new game.
- Captures sorted by value (q 9, r 5, b 3, n 3, p 1); +N only for the side ahead.
- Clock: running side in accent, waiting side dim, red at 30 s or less.
- Under 760px: moves pane drops below the board and the list becomes one horizontal strip.
